The Abstract

The Donation Hub is a website where users can view various non-profit organizations, pick which one/s to donate to, and have their account information stored into a database for future referencing. Utilizing the Macromedia programs Dreamweaver and Fireworks, the donation hub consists of php referencing, in-page referencing, numerous animations, a search engine, and allocations to a phpadmin database. The final project serves not only as a reflective summary of the knowledge brought to bear on the project, but also as a template for prospective employers who are seeking out creativity and perseverance in any of the areas which pertain to the Donation Hub.
